Aukenbauer, T., see Garcia-Barreno, B., 307
Auperin, D.D., Esposito, J.J., Lange, J.V., Bauer, S.P., Knight, J., Sasso, D.R. and McCormick, J.B.
Construction of a recombinant vaccinia virus expressing the Lassa virus glycoprotein gene and protection of guinea pigs from a lethal Lassa virus infection, 233

Babiuk, L.A., see Bielefeldt Ohmann, H., 335
Bauer, S.P., see Auperin, D.D., 233
Bielefeldt Ohmann, H. and Babiuk, L.A.
Induction of receptors for complement and immunoglobulins by herpesviruses of various species, 335
Brian, D.A., see Keck, J.G., 343
Buxton, I.K., Chan, S.P.K. and Plagemann, P.G.W.
The IA antigen is not the major receptor for lactate dehydrogenase-elevating virus on macrophages from CBA and BALB/c mice, 205

Chan, S.P.K., see Buxton, I.K., 205
Chartrand, P., see Roy, G., 11
Child, S.J., Franke, C.A. and Hruby, D.E.
Inhibition of vaccinia virus replication by nicotinamide: evidence for ADP-ribosylation of viral proteins, 119
Covey, S.N., see Turner, D.S., 49

Darai, G., see Scholtz, J., 63
Dube, S., see Zucker, M.L., 221

Esposito, J.J., see Auperin, D.D., 233

Franke, C.A., see Child, S.J., 119
Fuse, A., see Tada, A., 357

Garcia-Barreno, B., Jorcano, J.L., Aukenbauer, T., López-Galíndez, C. and Melero, J.A.
Participation of cytoskeletal intermediate filaments in the infectious cycle of human respiratory syncytial virus (RVS), 307
Ghosh, A.K., see Spodick, D.A., 263
Glenn, G.M. and Ricciardi, R.P.
Detailed kinetics of adenovirus type-5 steady-state transcripts during early infection, 73
Gould, A.R.
Conserved and non-conserved regions of the outer coat protein, VP2, of the Australian bluetongue serotype 1 virus, revealed by sequence comparison to the VP2 of North American BTV serotype 10, 145
Gould, A.R. and Pritchard, L.I.
The complete nucleotide sequence of the outer coat protein, VP5, of the Australian bluetongue virus (BTV) serotype 1 reveals conserved and non-conserved sequences, 285

Hanafusa, H., see Wang, L-H., 159
Hess, W.R., see Pan, I.C., 93
Hogue, B.G., see Keck, J.G., 343
Hruby, D.E., see Child, S.J., 119

Jorcano, J.L., see Garcia-Barreno, B., 307

Keck, J.G., Hogue, B.G., Brian, D.A. and Lai, M.M.C.
Temporal regulation of bovine coronavirus RNA synthesis, 343
Knight, J., see Auperin, D.D., 233
Kondo, A., see Tada, A., 357

Lai, M.M.C., see Keck, J.G., 343
Lange, J.V., see Auperin, D.D., 233
López-Galíndez, C., see Garcia-Barreno, B., 307

Maeda, S., see Tada, A., 357
Massa, P.T., Wege, H. and Ter Meulen, V.
Growth pattern of various JHM coronavirus isolates in primary rat glial cell cultures correlates with differing neurotropism in vivo, 133
McCormick, J.B., see Auperin, D.D., 233
Melero, J.A., see Garcia-Barreno, B., 307
Mousset, S., and Rommelaere, J.

Susceptibility to parvovirus Minute virus of mice as a function of the degree of host cell transformation: little effect of simian virus 40 infection and phorbol ester treatment, 107

Narang, H.K.
A chronological study of experimental scrapie in mice, 293

Obom, K.M. and Pogo, B.G.-T.
Characterization of the transformation properties of Shope fibroma virus, 33
Ostrove, J.M., see Reinhold, W.C., 249

Pan, I.C., Whyard, T.C., Hess, W.R., Yuasa, N. and Shimizu, M.
Epitopic diversity of African swine fever virus, 93
Parimoo, S., see Spodick, D.A., 263
Plagemann, P.G.W., see Buxton, I.K., 205
Pogo, B.G.-T., see Obom, K.M., 33
Pritchard, L.I., see Gould, A.R., 285
Prusoff, W.H., see Zucker, M.L., 221

Reinhold, W.C., Straus, S.E. and Ostrove, J.M.
Directionality and further mapping of varicella zoster virus transcripts, 249
Ricciardi, R.P., see Glenn, G.M., 73
Rommelaere, J., see Mousset, S., 107
Rösen-Wolff, A., see Scholtz, J., 63
Roy, G. and Chartrand, P.
Polyoma integrates readily in mouse cellular DNA, 11
Roy-Burman, P., see Spodick, D.A., 263
Rubino, M.J. and Walker, D.
Immunosuppression and murine polyomavirus infection, 1

Sasso, D.R., see Auperin, D.D., 233
Schnitzler, P., see Scholtz, J., 63
Scholtz, J., Rösen-Wolff, A., Touray, M., Schnitzler, P. and Darai, G.
Identification, mapping and cloning of the thymidine kinase gene of fish lymphocystis disease virus, 63
Schrader, A.P. and Westaway, E.G.
Translation mapping with the flavivirus Kunjin: gene order and anomalies in translation of NS5, 323
Sekine, H., see Tada, A., 357
Shimizu, M., see Pan, I.C., 93
Simizu, B., see Tada, A., 357
Spodick, D.A., Ghosh, A.K., Parimoo, S. and Roy-Burman, P.
The long terminal repeat of feline endogenous RD-114 retroviral DNAs: analysis of transcription regulatory activity and nucleotide sequence, 263
Straus, S.E., see Reinhold, W.C., 249

Tada, A., Fuse, A., Sekine, H., Simizu, B., Kondo, A. and Maeda, S.
Expression of the E2 open reading frame of papillomaviruses BPV1 and HPV6b in silkworm by a baculovirus vector, 357
Ter Meulen, V., see Massa, P.T., 133
Touray, M., see Scholtz, J., 63
Turner, D.S. and Covey, S.N.
Discontinuous hairpin DNAs synthesised in vivo following specific and non-specific priming of cauliflower mosaic virus DNA (+) strands, 49

Walker, D., see Rubino, M.J., 1
Wang, L-H. and Hanafusa, H.
Avian sarcoma viruses, 159
Wege, H., see Massa, P.T., 133
Westaway, E.G., see Schrader, A.P., 323
Whyard, T.C., see Pan, I.C., 93
Wilson, M.E.
A synthetic peptide to the predicted 6.9K translation product of the *Hin*dIII-H/*Eco*RI-D region of the AcNPV genome induces antibodies to the basic DNA-binding protein, 21

Yuasa, N., see Pan, I.C., 93

Zucker, M.L., Dube, S. and Prusoff, W.H.
The effect of 5′-amino-5′-deoxythymidine on the pattern of polyadenylation of herpes simplex virus type 1 ribonucleic acid, 221

Virus Research, 9 (1988)
Elsevier

Subject Index

Adenovirus-5, 73
ADP-ribosylation, 119
African swine fever, 93
5′-amino-5′-deoxythymidine, 221
anti-6.9K antiserum, 21
14kDa antigen, 93
Autographa californica nuclear polyhedrosis virus, 21

Baculovirus, 21, 357
Bluetongue virus, 145, 285
Bovine coronavirus, 343
Brain cells, 133
Brain infection, 1

C3b receptor, 335
Cauliflower mosaic virus, 49
Cell transformation, 33, 107, 159
3T3 TK$^-$ cell, 63
3T3 cells, 33
Cellular cytotoxicity, 335
Class II antigens, 205
Coronavirus, 343
Cotransfection, 11
Creutzfeldt-Jakob disease, 293
Cytokeratins, 307
Cytopathic effects, 133
Cytoplasmic ds DNA virus, 93

Direct repeats, 263
DNA hybridization, 63
DNA transfection, 63, 263
DNA-binding protein, 21

Early transcription, 73
Endogenous proviral transcripts, 263
Epitopic heterogeneity, 93
Expression vector, 357

Flavivirus gene order, 323
fps, 159

Genetic control, 133

Hairpin DNAs, 49
HATG medium, 63
Herpesviruses, 335
*Hin*dIII-H/*Eco*RI-D region, 21
HSV-1, 221

Immunosuppression, 1
Integration, 11
Iridovirus, 63

Kidney infection, 1
Kinetics, 73
Kunjin virus, 323

Lactate dehydrogenase-elevating virus, 205
Large T, 11
Lassa GPC gene, 233
Lassa virus vaccine, 233

Macrophage receptor, 205
Mice, BALB/c and CBA, 205
Molecular cloning, 285
Monoclonal antibody, 93
Mouse Cells, 11
Murine hepatitis virus, 133

Nicotinamide, 119
Nucleotide sequence, complete, 145

Octamer enhancer, 263
Oncogenes, 159
Oncogenic poxvirus, 33
Outer coat protein VP2, 145

Papillomavirus, 357
Parvovirus, 107
Polyadenylation, 221
Polyoma, 11
Polyomavirus infection, 1
Primer binding site, 263

Recombinant plasmids, 63
Recombinant vaccinia virus, 233
Respiratory syncytial virus, 307
Restriction enzyme, 63
Reverse transcription, 49

RNA, 343
RNA transcription, 249
ros, 159

Scrapie, 293
Scrapie-associated particles, 293
Silkworm, 357
Simian virus 40, 107
Spongiform encephalopathy, 293
